Wine Cabinets

— LUXURY WITHOUT LIMITS

With over 25 years of experience, Vigilant has mastered the complexities of creating climate-controlled wine cabinets and lockers that are also stylish and beautiful.

Beautiful Alternative to Traditional Wine Cellars

Vigilant wine cabinets and lockers are a luxurious and space saving solution to showcasing and efficiently storing your wine. Need your cabinet to blend seamlessly with existing décor and millwork? We can customize all aspects of your project: style, size, wood species, finish, and hardware.

Plus, our cabinets ship preassembled, eliminating the hassle and mess of traditional wine cellar construction.

Numerous interior design configurations

Adjustable, display and pull-out shelves, contemporary metal displays, individual and bulk storage options!

Anatomy of a cabinet

Not all wine cabinets are made the same. At Vigilant, we're dedicated to design, craftsmanship and efficiency. Every wine cabinet is made with the utmost precision with no shortcuts, giving you the best wine cabinet in the industry. Below is a diagram of the features and materials we believe are essential in creating the ultimate Vigilant wine cabinet.

WINE CABINET ANATOMY

1. Solid wood or metal clad frame
2. Commercial-grade cooling systems
3. Easy access digital thermostat*
4. Exterior grade weather stripping*
5. Wood or metal louvered top panel
6. Dual pane, argon-filled, high R-value, Low-E glass
7. Half mortise, heavy duty lock
8. Architectural insulated panel (R-7)
9. Heavy duty adjustable levelling feet
10. Selection of wine storage
11. LED lighting: display and sides
12. Multiple temp zones for wine type*

[DESIGN REQUEST](#)

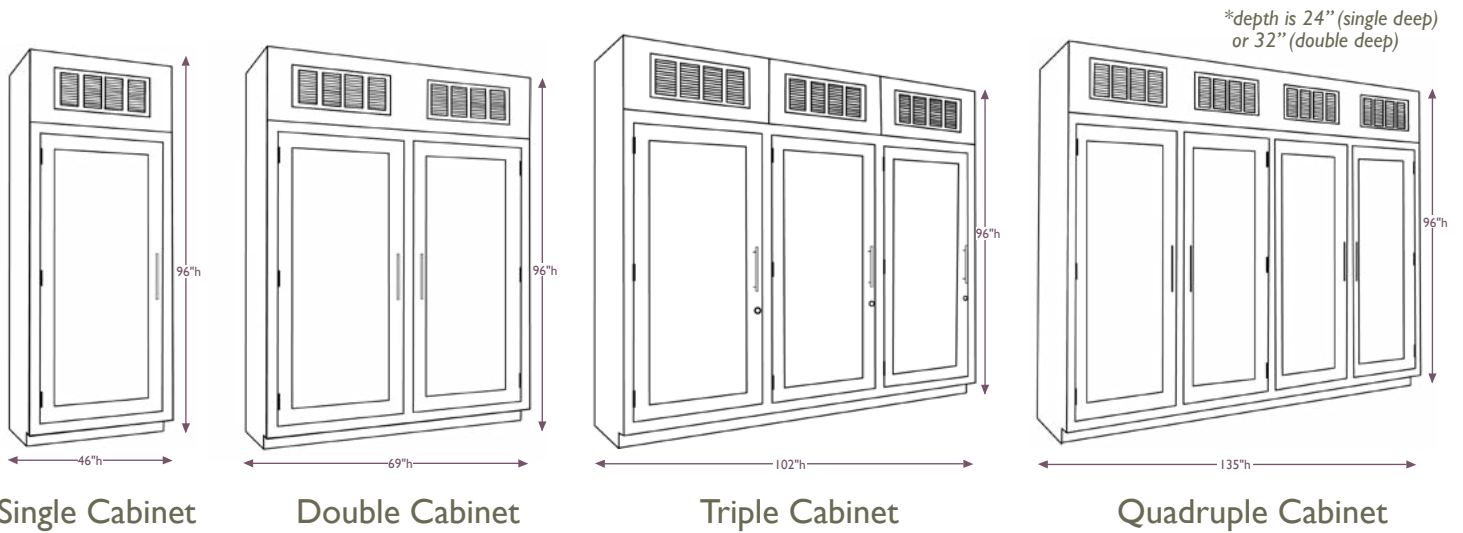

High ambient conditions to avoid

- Room temperatures consistently above 80°F
- Consistently high room humidity levels above 60% RH

Note: Three-season style rooms with open air walls may allow for these extreme conditions and condensation could develop on the outside of door glass.

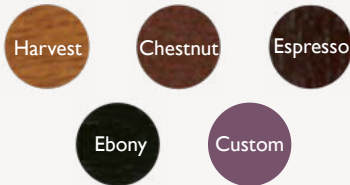

Cabinet Options

Our wine cabinets and wine lockers are enjoyed by notable clients and grace the finest restaurants, hotels, clubs and private homes throughout the world. We offer standard mahogany cabinets as well custom conditioned cabinets and wine lockers that meet your specific storage needs.

All of our cabinets are crafted in your choice of wood species, metals, acrylic or glass to match any decor and storage needs. Plus, all wine cabinets and lockers are backed by a 100% satisfaction guarantee.

[NOTABLE CLIENTS](#)

Cabinet Doors

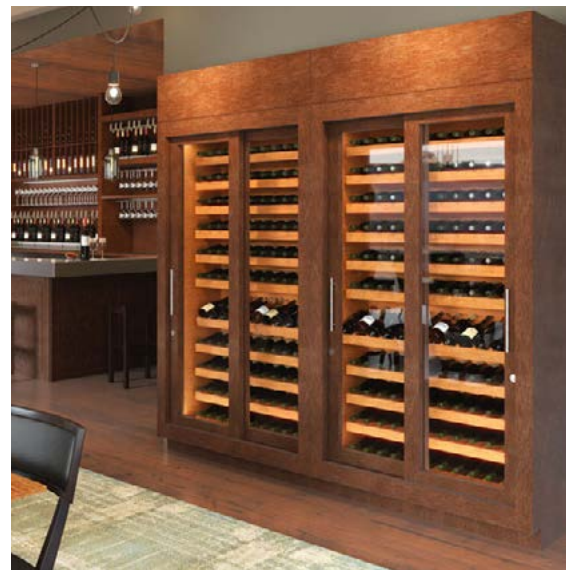

At Vigilant, we offer wood framed glass or sliding glass doors. All of our doors are handcrafted from the finest materials, creating the optimal display and storage environment for your wine collection.

Wood Framed Glass Doors

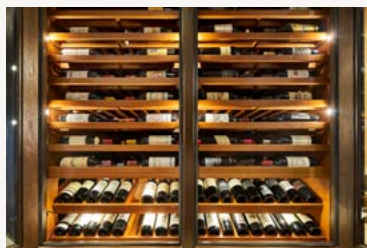

Our standard entry door is a mahogany framed glass door. These doors use heavy-duty 1 3/4" solid mahogany frames with argon filled insulated glass panels. Built to exterior-grade quality, these doors keep your wine at the perfect storage temperature.

Sliding Glass Doors

Our sliding glass doors are both beautiful and functional. They're a perfect option for tight spaces or heavy traffic areas. The sliding glass door option comes in a single cabinet unit that is wider than our standard dimensions (46 1/4" - 48"). These exterior-grade doors are fully insulated and sealed for the perfect wine storage environment.

Display Lighting

Add display lighting to your cabinet or locker for additional beauty and functionality. We use high-quality, energy-efficient LED lighting systems to limit harmful UV rays, and both can be used with a dimmer switch to adjust the brightness.

[LEARN MORE](#)

Bottle Storage

All of our wine cabinets are offered with four standard storage options: metal racking, individual bottle wine racks, slotted shelves and metal rods. We can also create any custom shelving for the wine storage option that best suits your needs.

LEARN MORE

Metal Wine Racks

Metal wine racks are offered in single, double or triple bottle deep options. These racks display the wine bottle label forward creating a stunning presentation for your wine. A standard double wide single deep cabinet can hold 200+ bottles in a triple deep configuration.

Individual Wine Racks

Our individual wooden wine racks come standard in mahogany with a display row to help organize and showcase your collection. Bottle capacity is 192 in a standard double wide single deep cabinet.

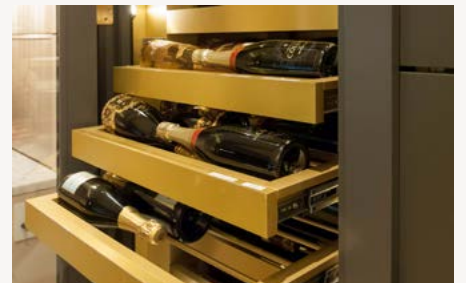

Adjustable Shelves

Our adjustable, slotted shelves are a beautiful and flexible storage option that allows you to accommodate many different sized wine bottles. With these wooden shelves, you may also opt for fixed display rows. The slotted shelving option accommodates approximately 180 bottles per standard single cabinet.

Pull-Out Slotted Shelves

These wooden shelves are designed just like our adjustable shelves, but are mounted on heavy-duty, full extension pull out slides. This gives you easy access to your wine and you may still opt for a fixed display row feature. These pull-outs are not vertically adjustable and because they extend out of the cabinet, wine bottle capacity is reduced to approximately 160 bottles per standard single cabinet.

Wine Lockers

As the leader in wine storage cabinetry, Vigilant offers a full line of modular, freestanding, and built-in wine locker cabinets manufactured to your exact specifications.

[EXPLORE ROI](#)

Brooklyn Point Condominiums, Brooklyn, New York

Standard or "as you wish"

The most affordable option for safe, carefree wine storage for multiple users is a standard wine locker. Choose flat or recessed panel door fronts in glass or frosted glass in a bank of 10, 15, or 20 lockers per cabinet.

Customize to match your decor

Choose drawers instead of doors, add lighting, custom wood, finish, and hardware, base or crown molding, and more...the sky's the limit!

Return on investment

Our clients structure their wine locker programs to recognize an ROI in as little as 12-18 months. Increase your annual revenue while enhancing customer experience!

Napa Prime Chophouse, Wexford, PA

Cooling Systems

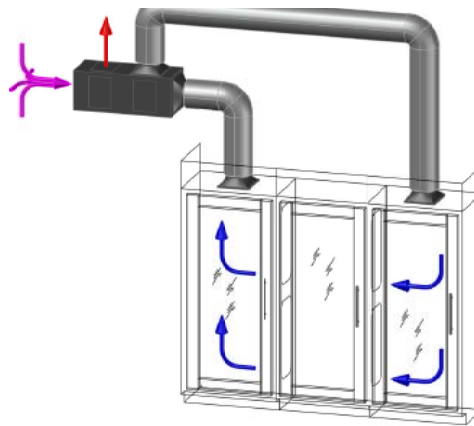

Our cooled wine cabinets elegantly store wine at the perfect serving temperature. All of our projects are based on sound design and engineering and we work with our clients to create a finished product that fits their aesthetics for form and function.

TOP MOUNTED

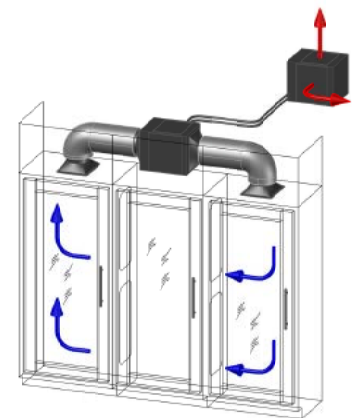

Top-mounted cooling systems are the most affordable option and simplest to install. These cabinets provide ideal storage for both serving or long term storage.

DUCTED

A remote ducted system is a more aesthetically appealing option with no visible grilles. As the system is located away from the cabinet, it allows for more vertical wine storage space. This creates the perfect wine storage conditions with minimal noise and heat exhaust.

DUCTED-SPLIT

Ducted-split cooling systems are highly adaptable and require no visible grilles. They consist of a fan coil unit (the evaporator) and a condensing system component. These systems are extremely quiet with very low audible noise at the cabinet location.

| FEATURES | TOP MOUNTED | DUCTED | | DUCTED-SPLIT |
|--------------------|-----------------------|-----------------------|------------------------|---------------------------------|
| System Location | Top of Cabinet | Top of Cabinet | Remote Ducted | Top Mount, Remote, Fully Remote |
| Visible Vents | Vented Front or Top | Vented Front or Top | Vented Remote | Vented Remote |
| Headspace | 20" | 36" | Varies | Varies |

Credenzas

BLEND OF
BEAUTY AND
FUNCTION

These American-made pieces are the perfect blend of beauty and functionality. With the added convenience of a decanting area above the refrigerated cabinet, these beautiful credenzas are perfect for wine tastings and entertaining guests. Create a piece that is uniquely yours by selecting a traditional or contemporary style, double-locking doors with optional frosted glass, and a superior cooling system.

The Vigilant Process

DESIGN

Define your aesthetic and functional requirements & specifications.

We'll work with you to ensure we understand the project requirements, including: budget, capacity, installation challenges, architectural integrations, cooling system selection, and customization.

PRICING & DRAWINGS

Pricing is presented, followed by detailed design drawings and specifications.

Once a pricing estimate is accepted, a deposit is required to generate detailed drawings and mechanical requirements. Larger, complex projects may require a larger deposit.

PROJECT APPROVAL

Project finalized and added to production schedule.

Once your project is approved, documents are signed, and a 50% deposit is received, your project is placed in our production schedule.

FABRICATION

Built-to-order based on your project documentation.

Our skilled production team gets to work on your project! Once in our production queue, you will receive an estimated lead time from our service team.

DELIVERY

Your order is carefully packaged and shipped with detailed installation instructions.

Once complete, your order is packaged, palletized, and shipped. If needed, we're happy to consult with you or your contractor to ensure successful installation.

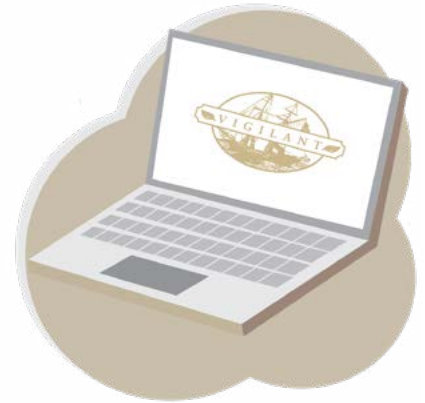

Design Resources
